A Generated-rule path: retained inputs, text and choices
Mapping M
Supplied labels on examples
Rule text R
Explicit local constraints
Choice Y
Parsed admit / defer response
Scoring target
Compare Y with M or fixed reference
Recorded inputs and outputs; the arrows do not identify internal mediation.
B Execution claims: authority, interface and effect obligations
Authorised boundary S
Independent source and applicability required
Interface records
Digest, declared targets, reported operations
Relevant effects E
Complete execution effects not jointly established
Authority claims additionally require protected state, complete mediation and sound effect abstraction.
Solid fields occur in retained studies; dashed requirements are not established by the advice pilot.
The mechanism studies use separate implementations; the diagram is not one evaluated lifecycle.
